

School Based Services

Woodfords' School Based Services Program provides specialized support to students experiencing challenges in the school setting.

Referrals for this program most typically come through a children's special education teacher or school-based treatment team.

Woodfords' School Based Services provides assessment and treatment services for children with developmental, mental health and/or co-occurring disorders within the mainstream school-setting. The program relies on the evidence-based principles and practices of Applied Behavior Analysis (ABA) to assess and analyze a children's strengths and goal areas.

Structured therapeutic services are designed to improve children's functioning in key areas. Services are provided as prescribed in the child's Individualized Education Plan (IEP) and Individualized Treatment Plan (ITP).

Each child receiving School Based Services has a dedicated treatment team that includes a Behavioral Health Professional (BHP) and may also include a licensed Clinical Social Worker or Professional Counselor and/or a Board Certified Behavior Analyst (BCBA).
